

DOUGLAS EBHOMAN

Technical Writer · Docs-as-Code · Developer Documentation

kingbetadaz@gmail.com · Prague, Czechia · [LinkedIn](#) · [GitHub](#) · dougasebhoman.github.io

PROFESSIONAL SUMMARY

Technical Writer specialising in Docs-as-Code workflows, Git-based documentation systems, and developer education content. Author of a six-part series on Git and GitHub for technical writers — maintained as a live GitHub repository and published on Hashnode. Experienced writing for audiences ranging from complete beginners to developers, with a proven ability to structure complex topics across interconnected, maintainable documentation.

WRITING PORTFOLIO

Git & GitHub for Technical Writers — *Hashnode Series* · *GitHub Repository*

git-and-github-for-technical-writers.hashnode.dev · github.com/Dougasebhoman/git-github-for-technical-writers-series

- Part 1: Git Basics for Technical Writers — foundational version control concepts for a non-developer audience.
- Part 2: Git vs GitHub — understanding the documentation workflow and the distinction between local and remote version control.
- Part 3: From Editing Files to Managing Versions — practical version control applied to real documentation workflows.
- Part 4: Pull Requests for Technical Writers — controlling documentation state in Docs-as-Code workflows.
- Part 5: CI/CD Pipelines — how documentation moves from a repository to a live published site.
- Part 6: Documentation Repository Architecture — in progress.

Static Website Security & Architecture Review — *GitHub Repository*

github.com/Dougasebhoman/static-portfolio-site

- Documentation-led review of a static frontend covering system architecture, security considerations, and explicit scope boundaries.
- Written for multiple audiences simultaneously: technical stakeholders, non-technical product teams, and complete beginners.
- Demonstrates decision-driven documentation: trade-offs, known limitations, and architectural rationale in plain language.

Getting Started with Notion — *GitHub Repository*

github.com/Dougasebhoman/notion-beginner-guide

- Beginner-level product documentation guide for Notion — written for non-technical users with annotated screenshots.
- Structured in Markdown with clear sections for setup, core features, and practical walkthroughs, demonstrating Docs-as-Code standards.

PROFESSIONAL EXPERIENCE

Founder & Technical Writer

KBD Creative · Prague, Czechia

Nov 2025 – Present

- Founded an independent technical writing practice producing documentation and educational content for developer tools and SaaS products.

- Authored and maintains the Git & GitHub for Technical Writers series — a six-part Docs-as-Code project published on Hashnode and maintained on GitHub.
- Produces architecture and security documentation for static frontend projects, writing for both technical and non-technical audiences within the same document.
- Builds GitHub documentation repositories showcasing Docs-as-Code practices, Markdown standards, and maintainable content organisation.
- Actively seeks community feedback on LinkedIn to refine explanations and improve documentation quality over time.

TECHNICAL SKILLS

Documentation: Technical guides, user manuals, knowledge base articles, tutorials, FAQs, release notes, architecture documentation

Tools & Platforms: Git, GitHub, Markdown, Docs-as-Code workflows, Notion, Google Docs

Technical Knowledge: HTML5, CSS3, JavaScript (basic), REST API concepts, CI/CD concepts, static site architecture, version control

Other: AI writing tools (Claude, ChatGPT, Grammarly), cross-functional communication, audience-adaptive writing

EDUCATION

Diploma in Web Development

Complete Computer Technology (CCT) · Benin City, Nigeria

May 2025

- Focus: HTML, CSS, JavaScript fundamentals

PROFESSIONAL INTERESTS

SaaS & enterprise product documentation · Knowledge base ownership & architecture · API documentation · Docs-as-Code workflows · Developer experience (DX) · User-centred technical writing
